

Identity Services Engine (ISE) - Services

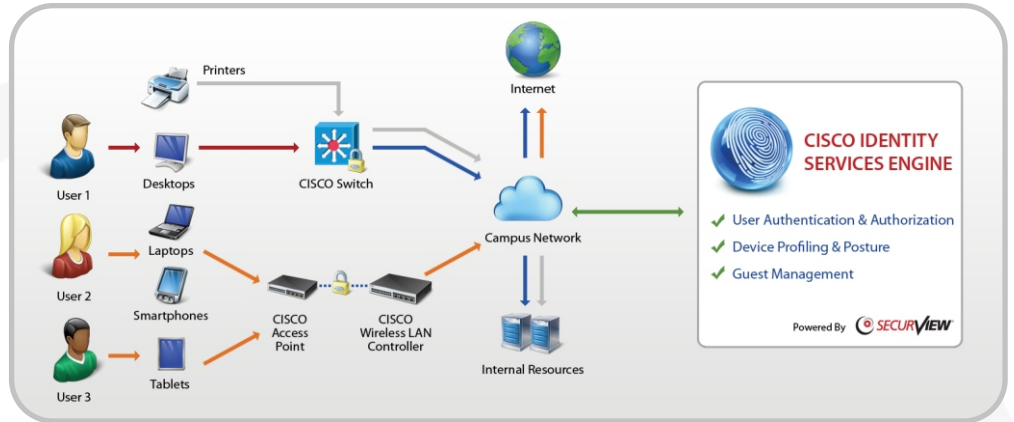

SERVICES PORTFOLIO

- ISE Infrastructure Readiness Assessment
- ISE High Level Design (HLD) Development
- ISE Proof of Concept (PoC) Development
- ISE Limited Deployment
- ISE Production Deployment
- Managed Service for ISE
- ISE Optimization and Policy Development
- ISE SME Engagement and Support

ISE SERVICES

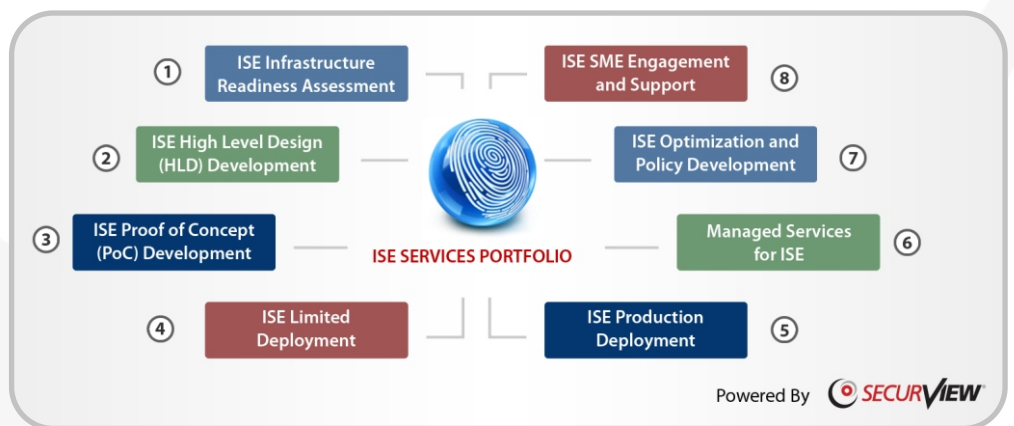

Cisco's Identity Services Engine (ISE) is an identity and access control platform that permits IT professionals to enforce compliance, enhance infrastructure security, and streamline service operations. ISE enforces security policy on all devices that attempt to gain access to the network, whether wired, wireless, headless (printers, cameras etc) or via VPN.

- ISE enforces policy based on:
 - User Authentication & Authorization
 - Device Profiling
 - Device Posture
 - User Location, access time and re-authentication intervals
 - Guest Management with optional Guest Sponsor Portal

SECURVIEW ISE SERVICES PORTFOLIO

SecurView has a deep understanding of the Enterprise Infrastructure Security and Compliance Domain with respect to ISE technology. SecurView has also managed some of the largest Network Access Control (NAC) projects. SecurView has a very advanced ISE lab and a highly skilled team which can deliver ISE portfolio services to Cisco partners and customers globally.

SecurView's services are available to ATP and non-ATP partners.

ISE INFRASTRUCTURE READINESS ASSESSMENT

- Gather requirements
- Review network diagram (Architecture)
- Review inventory of hardware (servers, switches, firewalls, WLAN controllers/AP's, OS versions)
- Recommendations including gap analysis report
- Optional remediation services if desired

CUSTOMER BENEFITS

- Protect the network from unauthorized access
- Enforce group policies to control user network access
- Policy based reports
- Enhance security posture
- Policy-based compliance reports
- Certified Security Analyst support
- Cost-effective delivery model
- Sustenance of ISE infrastructure

ISE HIGH LEVEL DESIGN (HLD) DEVELOPMENT

- Conduct workshop with customer to capture detailed requirements
- Arrange multiple interviews and meetings with all security and network stakeholders
- Map ISE requirements to network topologies to develop detailed ISE design recommendations
- Develop the HLD document including customer stated requirements, logical data and traffic flows and deployment considerations
- Provide recommendations and modified network diagrams as applicable

ISE PROOF OF CONCEPT (PoC) DEVELOPMENT

- Assist in setting up and configuring lab devices with onsite engineering
- Assist with development of the test plan and acceptance criteria
- Assist customer in carrying out the test plan
- Informal ISE Knowledge Transfer (KT) during lab setup and test plan execution
- The PoC implementation phase will be complete when all tests in the test plan have passed and acceptance criteria is met

ISE LIMITED / PRODUCTION DEPLOYMENT

- Assist customer in planning, deploying and configuring the Cisco ISE solution
- Assist customer in deploying the required agent software to end users and associated validation
- Deployment activities will include:
 - Deployment of ISE for remote access users
 - Deployment of ISE for wireless users at campus sites
 - Deployment of ISE for wired users at campus sites
 - Deployment of ISE for VPN users
 - Deployment of ISE for branch offices
- Monitoring, provisioning and related reporting will be achieved by using the corresponding ISE feature set and customer provisioning mechanisms (such as Microsoft SMS, Altiris etc.)

MANAGED SERVICE FOR ISE

- Availability monitoring 24x7x365 or as required
 - ISE appliances
 - Switching infrastructure
- Management
 - Policy management
 - New device integration
 - Posture assessment support
 - Incident management
 - Change management
 - Reports
 - Compliance
 - Availability
 - Customer portal

ISE OPTIMIZATION AND POLICY DEVELOPMENT

- Review business goals and requirements
- Review current security policy for access and authorization to network resources
- Map corporate policy to ISE group policies
- Provide recommendations

ISE SME ENGAGEMENT AND SUPPORT

- Provide optimization
- Policy configuration
- Any other complex challenge resolution
