

Cyber Security Services

Securing Enterprises From IT Threats Through Proactive Cyber Security Services

CUSTOMER BENEFITS

- Comprehensive Threat Visibility
- Identify Security Issues
- Thorough Regulatory Guidelines/Compliance
- Optimized Security Management
- Security Experts - Extension of in-house IT Security team

OVERVIEW

SecurView's Cyber Security Services aim at providing complete visibility of enterprise-wide security threats, vulnerabilities and their impending risks. It provides recommendations and counter measures to effectively diminish their threat impact and build a highly secure and resilient IT Infrastructure by achieving Confidentiality, Integrity and Availability.

CYBER SECURITY SERVICES OVERVIEW

SecurView's Cyber Security Service provides enhanced solutions to meet IT requirements of every organization. It is aimed at the protection of data and systems in networks that are connected to the Internet, from unmitigated risks and attacks. Cyber-attacks include viruses, worms, Trojan horses, phishing, denial of service (DOS) attacks, unauthorized access (stealing intellectual property or confidential information) and control system attacks. SecurView has the ability to deliver comprehensive cyber security services, with complete visibility of security threats ensuring a safer and secure organization.

CHALLENGES

Organizations need to shelter from the ever increasing information security risks and challenging compliance requirements. Interconnected corporate networks, eCommerce websites, B2B portals and other web applications that are exposed to the Internet are primary targets for hackers and other sundry attacks. This multiplying attack risk on customer data, intellectual property (IP) and financial records require adequate protection, in order to shield them from such incidents. CxOs need to be informed about these impending risks and vulnerabilities and need appropriate cyber security solutions to encounter and overcome these impediments.

SERVICE OFFERINGS

- Vulnerability Assessment
- Penetration Testing
- Web Application Security Testing
- Device Configuration Review
- Cyber Forensics Assistance Service

SERVICE HIGHLIGHTS

- Broad compliance with regulatory security standards (OSSTMM, OWASP, NSA, WASC)
- Conformity and complete utilization of automated commercial, proprietary, and other industry leading tools
- Extensive manual testing for deeper analyses and greater visibility
- Thorough business logic vulnerability verification
- Controlled environment Testing, without compromising on routine business activities
- 'Reassessment', to ensure discovered vulnerabilities are resolved.
